

Happy 15th
Birthday!!!

On February 19th, 1991, a group of credit unions made history when they formed a credit union owned software company they called:

“Credit Union Data Processing, Inc.”

From the humble beginnings of borrowing furniture, supplies, and even office space, CUDP has come a long way during those years.

CUDP has been able to produce a progressing and stable product that provides leading features at a great price. And CUDP continues to offer outstanding support.

CUDP's success has only been possible because of the great faith, trust, loyalty, patience, and confidence of our Credit Union owners.

We Salute you!

Please join us as we celebrate CUDP's birthday this month. As a thank-you to our loyal credit unions we are offering a 5% discount on any new module purchased and paid for between February 17th and March 31st, 2006. Thank-you for your support!
